Circle Power Executes Power Purchase Agreements with UPPCO

El Paso, TX (September 21, 2020) – Circle Power, a Michigan based renewable developer, has executed two power purchase agreements with Michigan’s Upper Peninsula Power Company (UPPCO). Circle Power is backed by Amber Infrastructure and it’s U.S. parent Hunt Companies, Inc (“Hunt”).

Eight wind turbines located in Houghton County, Michigan will generate electricity to be sold under the contracts.

The turbines will provide 40 megawatts in aggregate generation capacity. According to public data from the Michigan Public Service Commission, the agreements are among the lowest price utility-scale renewable power purchase agreements signed to-date in Michigan.

“We are pleased to reach this significant milestone,” said Jordan Roberts, Managing Partner at Circle Power. “UPPCO, as well as the Michigan Public Service Commission, were integral to the successful negotiation of these contracts, which will provide substantial value to UPPCO ratepayers.”

Circle Power, has been engaging with local residents and stakeholders to secure the land, permits, grid interconnection, and other requirements necessary for the wind turbines which are slated to be operational by the end of 2023.

Circle Power, Amber and Hunt have expanded their commitment to the Upper Peninsula of Michigan by developing additional wind and solar energy projects in the region.

About Circle Power

Circle Power is a Michigan-based renewable energy developer formed in late 2017. The Company is focused on the development of low cost solar, wind and battery projects. The Company’s three partners have amassed a track record that includes the successful development of over 3,200 MWs of wind and solar projects throughout the United States.
